2011 AAPT HIGH SCHOOL PHYSICS PHOTO CONTEST

1st Place – Natural Category

Student: Irene Eugenie Wehrwein

Cherry Creek High School

Teacher: Jessica Olsen

This photo is a wonderful representation of the physics principle of light reflection. The image of the bell tower of the Duomo in Florence, Italy is reflected in the water puddle on street. The still transparent water surface presents a perfect surface to reflect a mirror image of the surrounding area. The incident rays from the Duomo reflect off the water surface and create rays of refraction that reach the camera lens to create the reflected image. This forms a mirror image of the actual tower. Because of the rules of light reflection, the angle of incidence is equal to the angle of refraction.

INTRODUCTION

The Mission of the American Association of Physics Teachers (AAPT) is enhancing the understanding and appreciation of physics through teaching. Local sections represent a vital extension of the fulfillment of AAPT's mission at regional and local levels. This document is provided by the AAPT to Section Officers to assist them in their relationships with AAPT's Executive Office and with other local sections.

Local sections vary considerably in geographic location and size, membership, and activities. However, all sections are recognized by AAPT through the pursuit of common objectives and through the provision that most members of the AAPT Council are Section Representatives who are determined by the local sections. These representatives participate in the governance and constitutionally mandated activities of AAPT.

On behalf of the members of AAPT, I thank you for your service. As a Section Representative, you provide the knowledge of the physics programs and physics educators in your geographic region. Your role of providing advice and input to the Executive Office and the Executive Board on matters of concern to you and your section is integral to our success.

One of the unique features of AAPT is the interaction between volunteers like you who are committed to physics education, and members of the Executive Board and the staff at the Executive Office who are responsible for ensuring that AAPT programs, services, and publications are of the highest quality possible. The AAPT Executive Office staff provides logistical support and leadership in specialized areas from developing publications and designing Websites to managing marketing efforts and organizing meetings, topical conferences, and workshops. We are all committed to our Association being successful and you can count on the Executive Office and Executive Board to support you in the common goal of improving physics education.

Joe Spaccavento, North Arlington High School, NJ, nicely summarizes the role of the Executive Office and sections. "The AAPT is the backbone which supports all of the various sections of AAPT which in turn service those teachers who might not have the opportunity to attend a national meeting. I serve as the New Jersey Section Representative and wear my title proudly. To truly see all of the contributions of the AAPT one must look at the work being done by the sections as well."

On behalf of the Executive Office and the Executive Board,

Beth A. Cunningham, Executive Officer

AAPT PROGRAMS

[NATIONAL MEETINGS TWICE A YEAR](#)

These meetings give you a chance to:

- Attend physics workshops
- Meet and greet other physics teachers
- Form networks internationally, nationally, and locally
- Meet exhibitors who provide the most current and up-to-date physics resources

[PHYSICS TEACHING RESOURCE AGENTS \(PTRA\) PROGRAM](#)

Established in 1985, this program seeks to provide sustained professional development to teachers of physics and physical science. By maintaining a cadre of over 100 accomplished high school teacher leaders, trained and updated yearly, this program produces teachers who go out to meet the specific professional development needs of teachers in their local area.

[AAPT PHYSICS BOWL](#)

Each year, approximately 10,000 high school students take a 40-question, 45-minute long, multiple-choice test under their school's supervision. AAPT awards certificates of participation to all competing teachers and students.

[PHYSICS TEAM](#)

The U.S. Physics Team Program promotes and demonstrates academic excellence by preparing outstanding high school students to participate in the International Physics Olympiad. The U.S. Physics Team fulfills its mission by:

- Expanding awareness of and participation in the program
- Providing a meaningful scientific and cultural experience for team members, including opportunities to network and meet new people
- Learning in intellectual and experiential ways
- Gaining international exposure

[NEW FACULTY WORKSHOPS](#)

The American Association of Physics Teachers (AAPT), in conjunction with the American Astronomical Society (AAS) and the American Physical Society (APS), holds workshops for new physics and astronomy faculty members twice each year at the American Center for Physics.

These workshops are led by internationally renowned physics and astronomy educators. The goals of the conference are: helping new faculty understand how students learn physics and astronomy; learning about new educational technologies in the field; becoming aware of new ways of promoting student learning through active engagement and impacting a new professor's teaching methods.

[COMPADRE](#) (COMMUNITIES FOR PHYSICS AND ASTRONOMY DIGITAL RESOURCES IN EDUCATION)

ComPADRE is a well-organized network of digital collections of high-quality educational materials in physics and astronomy. These collections connect to a wide range of digital resources, including curricular materials, digital libraries, and online journals.

[PHYSTEC](#) (PHYSICS TEACHER EDUCATION COALITION)

PhysTEC is a joint project of AAPT and APS whose mission is to improve and promote the education of future physics and physical science teachers. Specifically, the project aims to

- Demonstrate successful models for
 - Increasing the number of highly qualified high school physics teachers
 - Improving the quality of K-8 physical science teacher education
- Spread best-practice ideas throughout the physics teacher preparation community
- Transform physics departments to engage in preparing physics teachers

[PEER REVIEWED JOURNALS](#)

AAPT publishes two peer reviewed journals and many other publications in both print and online. The American Journal of Physics is aimed at college and university faculty. The Physics Teacher focuses on teaching introductory physics at all levels.

[GRANTS, COMPETITIONS & AWARDS](#)

AAPT sponsors many competitions, grants, awards, and other programs designed to foster an interest in physics, a desire to excel in the study and instruction of physics, and a sense of community and teamwork with in the physics education community. Some of these include: Apparatus Competition, High School Physics Photo Contest, International Science and Engineering Fair,. The AAPT Awards Committee invites [nominations](#) for the association's various awards:

- [The John David Jackson Award for Excellence in Graduate Physics Education](#)

DEVELOPING AN AAPT STRATEGIC FRAMEWORK

Throughout our recent history, AAPT has engaged in planning the future of our organization through retreats in 1981, 1990, and 2000. At the 2005 Summer Meeting, President Richard Peterson and the 2005-2006 Executive Board agreed to undertake strategic planning over the following ten months, culminating with a three-day retreat at Belmont Conference Center, Baltimore, MD. These activities were organized to coincide with the planned retirement of Executive Officer B. Khoury (1990-2006). The Executive Board invited former President Karen L. Johnston to facilitate the planning processes and the retreat. Members of the Executive Board prepared a set of white papers on membership, sections, etc. for the retreat. Section Representatives, Area Committee Chairpersons, leaders in PIRA, Executive Office staff, and other groups were invited to provide input to the retreat deliberations. The white papers and record of the retreat is available at (<http://www.aapt.org/sections/docs.cfm>).

The retreat led to the second phase of the planning. President Ken Heller appointed a planning advisory group (PAG), consisting of Dick Peterson, Ruth Chabay, Dwain Desbien, and Alan Gibson, along with Warren Hein to assist new Executive Officer Toufic Hakim in his efforts to develop and refine a set of ambitious leadership goals for the organization. Karen Johnston was commissioned by Hakim to meet with the PAG and offer assistance in organizing the agenda for the PAG meetings. The four meetings of the PAG focused on the following: (1) the vision (where we see ourselves as an organization / the horizon) and values (core beliefs, principles and ideals), (2) the constituency that we represent, (3) the external affect on the physics teaching and education community, (4) membership (whom we serve and whom we should serve; benefits, models of membership), and (5) governance (how to engage the sections and their representatives, how to involve the area committees in driving and supporting our national agenda). At the conclusion of the PAG meetings, the Executive Officer prepared a draft strategic framework to guide AAPT.

In 2007, President Harvey Leff appointed an Ad Hoc Governance Review Committee (GRC), chaired by Mary Beth Monroe, to advise the AAPT Executive Board on governance issues and review AAPT governance documents and prepare an organizational chart that briefly describes the purpose of and indicates the connections among the different committees, programs, groups, and outreach efforts sponsored by AAPT. The work of the GRC continues as of October 2009.

With the guidance of a planning team, AAPT convened a retreat for Area Committee chairs and Section Representatives (ACC/SR) in May 2007 at ACP to discuss the current structure and possible restructuring of AAPT. Several models were presented over the two days and the planning team met to summarize and report those models to the Executive Board. The text of their report is available at (<http://www.aapt.org/sections/docs.cfm>). President Leff appointed a temporary Executive Board Committee on Governance Structure (CoGS), chaired by Lila Adair, to study, summarize, and synthesize the following documents: the organizational chart of AAPT structure prepared by the GRC, the models presented by the planning group from the ACC/SR retreat, and other relevant documents. The work of the CoGS continues as of October 2009.

Changes in leadership within the Executive Office in early 2008 resulted in an interruption of some aspects of the strategic planning process. In April 2009 the Executive Board re-engaged in strategic

planning with Karen Johnston facilitating the process. Significant time was dedicated to the strategic planning effort by the Board at its meetings in July and October 2009 with Johnston's leadership. In parallel, staff members in the Executive Office have been using the Board's strategic planning framework to guide program and financial planning and membership services and recruitment.

The current plan is available at (<http://www.aapt.org/sections/docs.cfm>).
