

Jeffrey Bennett, astronomer, teacher, and writer, is the recipient of the [2023 AAPT Klopsteg Memorial Lecture Award](#). This award recognizes educators who have made notable and creative contributions to the teaching of physics.

Bennett received his B.A. in Biophysics from the University of California at San Diego and an M.S. and Ph.D. in Astrophysics from the University of Colorado at Boulder. Specializing in mathematics and science education, he writes for and speaks to audiences ranging from elementary school children to university faculty.
