- Assessing Online Teaching in the age of COVID-19

# Assessing online teaching

- Teaching evals are critical for contingent and tenure-line instructors
- Many universities are teaching online in the fall (and possibly beyond?)
- Most of us did not want to be teaching online!
- How does “Active learning” transfer to online classes?
- Online teaching will continue to be part of our reality in the future.
- Coming to class sick is no longer an option, for students or faculty. We need to all be able to teach and learn from home when we need to.

# Guided questions for break-out rooms

- How did your department handle evaluations this spring?
- Is “Involuntarily online” teaching evaluated differently than “I chose to be” online?
- What should the criteria be for online courses? Resources?
- How should online lab instructors & TA’s be evaluated?
- Let’s regroup at X:40 to share ideas. Choose one person to represent your group.
