Dear Physics Teachers,

Thank you for encouraging and supporting your students’ participation in the AAPT PhysicsBowl contest! This year there were nearly 11,600 students participating from 484 schools from Australia, Brazil, Canada, Egypt, Germany, Hungary, India, Indonesia, Japan, Kazakhstan, Malaysia, Malta, New Zealand, Pakistan, Saudi Arabia, Serbia, Singapore, South Korea, Switzerland, Taiwan, Thailand, Turkey, United Arab Emirates, United Kingdom, United States, and Vietnam, as well as 675 schools participating from China.

Because of the large number of Chinese schools, the contest is divided into two parts. Students in Regions 00-14 are competing for prizes from AAPT, while ASDAN China is coordinating the contest for students in Asia and the Middle East. As a result, for simplicity in trying to read the long lists, there are three files: the list of winners in Regions 00-14, the list of winners in Regions 15-21, and a list of the top students/teams from all regions in both divisions.

Instructors from Regions 00-14 can obtain their students’ scores from the AAPT website. That link will be provided to you in an email from the national office. Please realize that we were able to retrieve some scores that were disqualified for improperly recording the required information and this this was done after-the-fact. If the information was not encoded correctly, the student was automatically disqualified from winning prizes even though we may be able to link that student to your code now. Some students provided no codes, the wrong regions, no name, just a last name, etc. There are a lot of records and we cannot go back and fill in missing information. While it is unfortunate to disqualify anyone, these are the rules of the contest. Sadly, some very high scores were disqualified. If you are still missing a student’s score, please email jlane@aapt.org with student information (CEEB, teacher codes, etc.) and we can try to find the information.

Information is being provided to ASDAN China to find scores from Regions 15-21.

We will, as always, be trying to improve the contest and we look forward to your participation again in 2025. If you have suggestions for improvement, kindly email them to us, and we will take them into consideration for future years.

The statistics from this year’s contest are as follows.

Division 1 had an average score of 19.5. Statistically, the easiest question was #3 (89.9% correct) while the most difficult question was #40 (14.4% correct). There were 7396 exams scored and 571 teams.

Division 2 had an average score of 19.4. Statistically, the easiest question was #28 (89.4% correct) while the most difficult question was #48 (12.2% correct). There were 4189 exams scored and 410 teams.
It is a challenging task to produce a 40-question exam that has a small percentage of very high scores, while still not being overly difficult and remaining fair to the majority of the students that take it. As in previous years, and in an effort to continually improve this opportunity for students, adjustments will be made to future exams.

Statistics for 2024 exam

Average Score for Division 1 = 19.5 with a standard deviation of 6.0
Average Score for Division 2 = 19.4 with a standard deviation of 6.1

We look forward to having you participate in next year’s contest! Please spread the word and encourage your colleagues to have their students participate in future contests.

Sincerely,

Jon Anderson
