

American Association of Physics Teachers **PHYSICSBOWL 2012**

2012 PhysicsBowl Results

Dear Physics Teachers,

Thank you for having your students participate in this year's AAPT PHYSICSBOWL contest.

This year there were more than 5000 students participating from 250+ schools across the United States and Canada as well as schools in China and Italy! Enclosed are lists of the overall top 10 students in each division, the overall top 5 schools in each division, the first and second place schools in each division by region, and the first and second place students in each division by region. Several placings were determined by tie-breakers. For students, the answers were compared from the end of the test forward until the tie was resolved. For schools, the tie was broken by comparing the highest scoring students for each team. Unfortunately, we received many answer sheets which did not properly fill in the required information which resulted in the student's score being disqualified for consideration of either individual prizes or for the team score. This is an unfortunate necessity because of the amount of data that must be analyzed.

This year, the following prizes are awarded:

- To the top overall school in each Division
 - \$100 gift certificate awarded from [Pasco Scientific](#)
- To the top 5 overall schools in each Division:
 - \$100 gift certificate awarded from [Frey Scientific](#)
 - "PhysicsBowl Champion" T-shirts awarded to the five top students from each school from [AAPT](#).
- To the top two scoring schools in each region/division:
 - \$50 gift certificate (limit one) awarded from [Vernier Software & Technology](#) (except if the school already won a Top 5 award in the other division)
 - "PhysicsBowl Champion" T-shirts awarded to the five top students from the *1st* place school in each region from [AAPT](#).
 - A rattleback from [Arbor Scientific](#).

All student winners will receive a copy of "Used Math" from [AAPT](#) as well as a TI-30 XS MultiView Scientific Calculator awarded from [Texas Instruments](#). In addition, student winners receive

- To the top 10 overall students:
 - Divisions 01 & 02: A copy of "Quantum Mechanics in a Nutshell" - [Princeton University Press](#)
 - Div. 02 only: A copy of "Introduction to Classical Mechanics" from [Cambridge University Press](#).
 - Div. 01 only: A book from [Princeton University Press](#)
- To the 1st place student in each Division by Region
 - A copy of "Mad about Physics" from [John Wiley & Sons](#)
- To the 2nd place student in each Division by Region
 - A Mysterious Glowing Ball from [Educational Innovations, Inc.](#)

A copy of this year's test along with solutions, as well as individual and team winners can be found at the following web site: <http://www.delta.edu/michaelfaleski/PhysicsBowl>

American Association of Physics Teachers **PHYSICSBOWL 2012**

We had the good fortune of having many wonderful sponsors again this year. We hope to continue our relationship with these companies in the future. One way to ensure that this happens is for teachers to send thank you's to the companies when ordering materials and to use the gift certificates provided. It was learned this last year that only about 1/3 of all certificates are cashed in any given year. We hope that you use your certificates to help your physics program in the coming years.

Instructors can obtain the scores of their students from the AAPT website and that link will be provided to you in an email from the national office. Please realize that we were able to retrieve some scores that were disqualified for improperly recording the required information, but this was done after-the-fact. If the information was not encoded correctly, the student was immediately disqualified from winning prizes even though we may be able to link that student to your code now. Some students provided no codes, the wrong regions, no name, just a last name, etc. There are a lot of records and we cannot go back and fill in missing information. While it is unfortunate to disqualify anyone, these are the rules of the contest. Sadly, some very high scores were disqualified. If you still are missing a student's score... please email michaelfaleski@delta.edu with student information (CEEB, teacher codes, etc.) and we can try to find the information.

In addition, emails often are received about the competitive balance in some regions. That is, there are questions about whether some schools should really be competing in a regular region or Region 01. A few of these issues were looked at this year by the PhysicsBowl Advisory Board to make rulings as to whether some schools should have been competing in Region 01 and be moved. This is a very difficult task for those of us not actually at the schools in question, but a good rule of thumb... if your school has "math, science" and/or "technology" in its name, it should probably be in region 01! ☺

Based on recent trends, the PhysicsBowl Advisory Board will again be looking at the competitive balance in regions. Some regions are really starting to boom as far as the number of schools and we shall see what we can do to make it as fair a playing field as we can. We are doing the best that we can and are not trying to be punitive to any schools. We ask that folks please be patient as we try to tackle a very difficult issue! Regardless, in the near future (2013), regions will be revised.

Finally, we are happy to report that between student and team winners, 29% of the schools that entered this year won some kind of prize!

American Association of Physics Teachers PHYSICSBOWL 2012

The statistics from this year's contest are shown below.

Division 01 had an average score of **17.0** (close to last year's average). Statistically, the easiest question was #1 (95% correct) while the most difficult question was #33 (9 % correct).

Division 02 statistics were very close to last year's contest as well with an average of **16.0**. Statistically, the easiest question was #17 (91% correct) while the most difficult question was #35 (11% correct)

The production of a challenging contest of only 40 questions that has a small percentage of very high scores while still not being overly difficult to discourage the majority of students is an enormous task. We will continue to write the best contest that we can and hope to make it even better next year!

Statistics for exam

Average Score for Division 01 = **17.0** with a standard deviation of 5.9

Average Score for Division 02 = **16.0** with a standard deviation of 5.6

Figure 1. Division 01... # students vs. Score

Figure 2. Division 02... # students vs. Score

We look forward to having you participate in next year's contest... and please let your colleagues at schools near you know about the contest! We are considering how to expand the contest to include more schools and students next year as well as making some more changes with the contest to improve it. Work will continue on the PhysicsBowl website (please keep checking it) as we look to make some possibly more substantial changes in the near future.

Thank you for participating,

Michael C. Faleski
PhysicsBowl Academic Coordinator
