Mission

- Identify new developments in educational technology and new applications of educational technology to physics teaching and learning;
- Communicate these new developments and applications to the AAPT membership through a variety of means, including print and electronic publications, workshops, and sessions at national and regional meetings;
- Conduct competitions, as appropriate, to recognize, promote, and reward worthwhile contributions to the uses of educational technologies for physics education; and
- Coordinate with other area committees, organizations, and institutions in the development and dissemination of new ideas for the use of various educational technologies in physics education.

Mission

- Provide a forum for consideration of topics relevant to graduate instruction in physics.
- Through communication with the Committee on Physics in Undergraduate Education and with the AAPT membership, seek ways in which students may be better prepared for the transition from undergraduate school to graduate school, and ways in which students may emerge from graduate school better prepared for undergraduate teaching as well as academic and industrial research.
- Aid in keeping the AAPT membership and other academic and research physicists aware of effective means of conducting graduate instruction in physics, in classrooms and in research.
- Provide effective communication, through accepted channels, between AAPT and research oriented scientific and engineering societies with overlapping interests.

Mission

- To provide a focal point (forum) for communication and unification of laboratory topics and activities of mutual interest to area committees, to high school teachers, to two-year College teachers and to University teachers. This shall include but not be limited to the dissemination of information about innovative ideas, technology, and techniques pertaining to physics laboratories.
- To promote cooperation, discussion and coordination among pre-high school, high school, two and four-year College, and University teachers as they define the nature and Department of the physics laboratories necessary to build a reasonable foundation for successive levels of student achievement in physics.
- To provide assistance to the Executive Board and AAPT Council in developing policy statements and recommendations A) on the importance and use of the laboratory in physics education and teaching at all levels, and B) on safety issues related to laboratories.
- To stimulate the development of new or improved apparatus and experiments for physics laboratories.
- To provide guidance and support for the professional development of all laboratory personnel, including A) faculty, B) teaching assistants, and C) professional resource managers.

Mission

- The role of the AAPT Committee on Teacher Preparation is to influence policy and activities within the AAPT that foster improvement of physics teacher preparation based on the research in physics learning and the physics teaching experience of the AAPT membership. The Committee will:
- Provide a forum and support the continued development of a strong and diverse coalition of institutions committed to using inquiry-based, problem-solving, and active-learning strategies in science courses they provide for secondary and elementary teachers of physics.
- Sponsor and co-sponsor sessions, workshops, and other activities to make AAPT members and the broader educational community aware of programs that produce teachers who better understand physics and how to teach it so that ALL students can experience physics as an important, engaging, and exciting activity.
- Offer assistance in the development of program standards and selection of curriculum for teacher preparation programs. Support AAPT sections in regional or state efforts related to certification/licensure, program requirements, and physics content tests for teachers of physics.
- Increase communication, collaboration, cooperation, and joint sponsorship of interactions with other national organizations that have improving teacher preparation as part of their organization's stated mission to share findings and experiences and to exchange constructive critical examination of the physics teacher preparation process.
- Develop a strong, working committee with wide representation from other area AAPT committees and liaisons from other organizations to expand and share the work of the committee in AAPT and beyond.
