

Kevin Zhou

U.S. Physics Team Coach

Stanford University

Stanford, CA

I'm a PhD student at Stanford, focusing on new ways to search for dark matter. I'm excited to be finally returning to camp in person, for the first time since before the pandemic. During the pandemic, I compiled a huge bank of [interesting physics problems](#), and I hope to learn about a few more from the bright students at camp! Outside of physics, I'm currently into climbing, science history, and the puzzle game Baba Is You.
